

Please note that this is a sample report and not a complete report of the test.

Tom, this is your
ancestry report

SAMPLE REPORT

Introduction

This Ancestry Report shows where your anthropological roots come from. We compare your genetic map with a vast database of DNA with markers from countless locations around the world.

Thanks to the genetics inherited from your ancestors, scientists can determine from which geographical areas and countries of the world you come from.

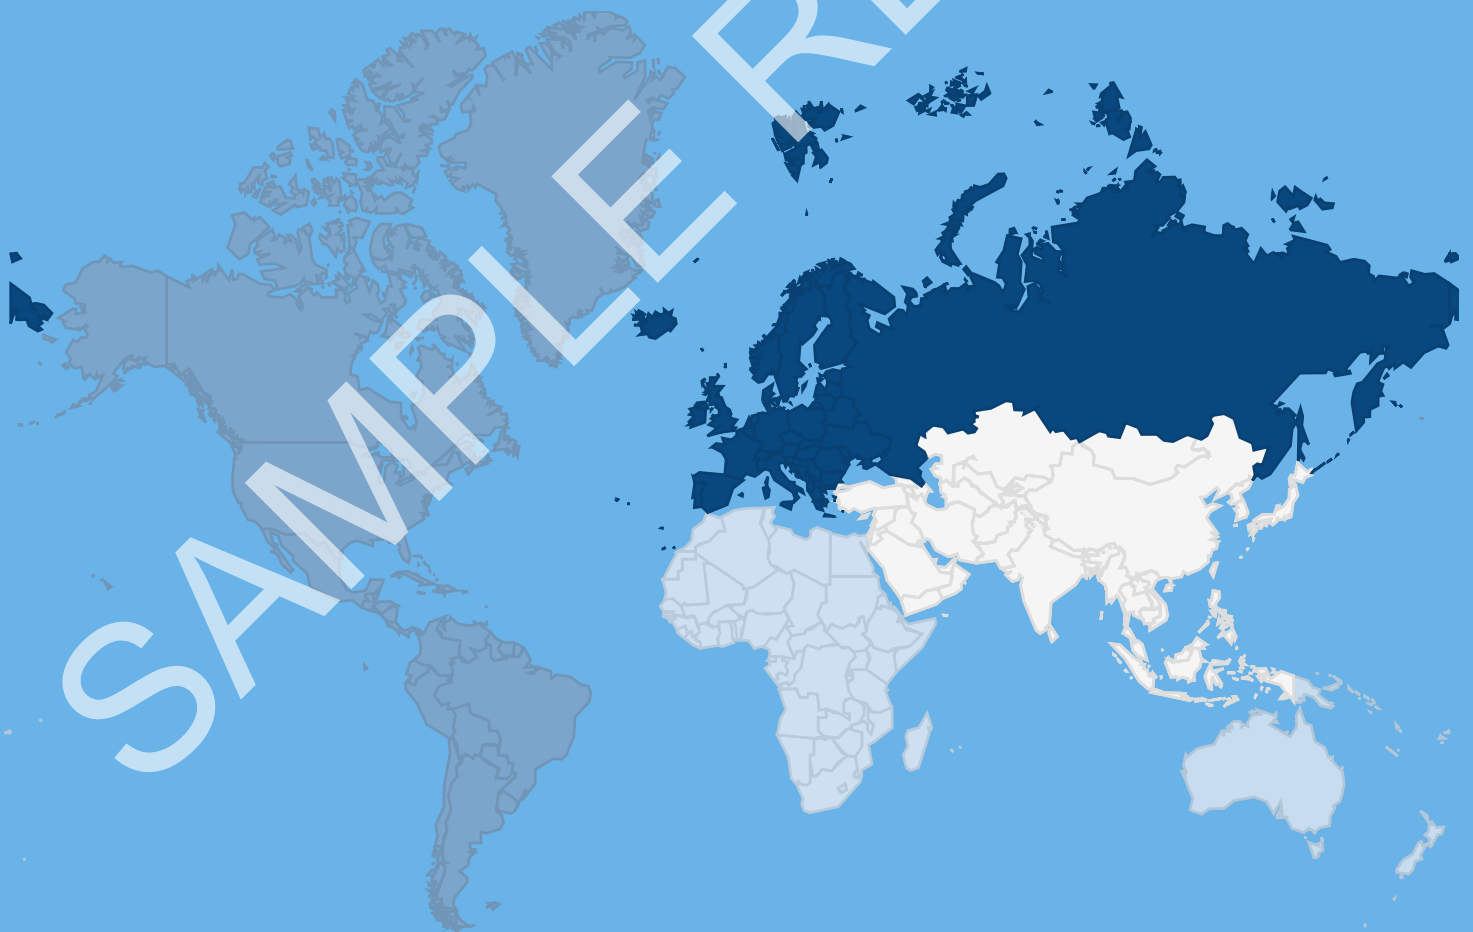

This test is performed on the Autosomal DNA that is the one that gives us the genealogical information of both the father and the mother, inherited in turn from previous generations, dating back hundreds or even thousands of years.

There are different methodologies for calculating the ancestral roots that provide different results. We use what we believe are the best algorithms that, may be inaccurate in detail but quite accurate in the basics.

The data presented in this report are statistical approximations, and at no time show accurate data, although thanks to our 700,000 genetic markers test, we can reach a great level of detail.

Global Vision

EUROPE	71,20 %	AMERICA	21,20 %
RUSSIA	5,00 %	AUSTRALIA	2,00 %
AFRICA	0,60 %		

Countries

Great Britain	33,75 %	Switzerland	17,80 %
Spain	15,00 %	Argentina	11,45 %
Russia	5,00 %	Canada	3,90 %
